

WORKSPACE GERMS WHAT TO DO!!

- Wash your hands frequently with warm water and soap
- Use waterless sanitizing gel to clean hands if soap and water are not available

GERMS CAN THRIVE ON WORKSPACE SURFACES

- Wipe down your computer keyboard and mouse daily – use alcohol wipes or disinfectant wipes – especially important if you are in a shared workspace
- Clean your phone and desk tops daily

Phones can be “hot” spot for germs, as can computer keyboards, computer “mice” and desks.

Influenza viruses can live up to two days on hard surfaces but are inactivated by disinfectants.
